 Avoid chaining critical requests — 17 			

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

A Background and foreground colors do not have a sufficient contrast ratio.

Internationalization and localization — These are opportunities to improve the interpretation of your content by users in different locales.

A https://chtml element does not have a valid value for its [lang] attribute.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

A Links do not have a discernible name

Additional items to manually check (11) — These items address areas which an automated testing tool cannot cover.

Progressive Web App

These checks validate the aspects of a Progressive Web App. <u>Learn more</u>.

Page load is fast enough on mobile networks	
Current page does not respond with a 200 when offline	
start_url does not respond with a 200 when offline No usable web app manifest found on page.	
Installable	
Uses HTTPS	
▲ Does not register a service worker that controls page and start_url	
▲ Web app manifest does not meet the installability requirements Failures: No manifest was fetched.	
PWA Optimized Redirects HTTP traffic to HTTPS	
▲ Is not configured for a custom splash screen Failures: No manifest was fetched.	
Does not set a theme color for the address bar. Failures: No manifest was fetched, No ` <meta name="theme-color"/> ` tag found.	
Failures: No manifest was fetched, No ` <meta name="theme-color"/> ` tag found.	
Failures: No manifest was fetched, No ` <meta name="theme-color"/> ` tag found. Content is sized correctly for the viewport	

Additional items to manually check (3) — These checks are required by the baseline PWA Checklist but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
